

Try the role of a **Production Buyer** Yourself...

What you need to do:

You are going to play the role of “production buyer”, which means you are in charge of buying the “props” or items needed for the people competing on the Channel 4 TV programme “Lego Masters”.

You have been given **£300** to buy the items listed below, this is your “budget”. You cannot spend more than your budget amount.

Have a look at the grid below and highlight where you need to buy each item from so that you can get them all without spending more than the budget of money you have been given.

You need to consider whether the multibuy discount options are worth doing after taking into account the star rating from customers who have bought the product before (this gives you a sense of the quality of the product – 5 star is high quality and 1 star is low quality).

Please note: Not all products have a multibuy discount option or a customer star rating available, so you have to make your buying decisions based on the information you have below.

Calculate how much you will be spending all together to buy all the items and how much money from your budget is left at the end. Be ready to justify your buying decisions at the end of the task.

	3 x Coloured Lego storage units to put the Lego pieces in 	1 x Lego patterned shirt for the presenter to wear 	10 x Lego brick bases to build on 	30 x storage jars for smaller Lego pieces 	10 x metal bins to store larger Lego pieces in
